WHAT IS A PROJECT PARTNERING REQUEST AND HOW DOES IT WORK?

With a project partnering request you can reach out to members of European Bioplastics that have expressed their interest in co-operative research activities. This project partnering request does not commit you to accepting partnering applications that you receive in response; it is simply a tool to assist you with matching your consortium building efforts with relevant expertise in our membership network.

By submitting this form, you authorise European Bioplastics to forward your request, including your contact data, to its member organisations by email. European Bioplastics reserves the right to establish the relevance, feasibility, and compatibility of all requests with the services, products, and research activities of its member organisations before forwarding your request, and to reject project partnering requests at their own discretion.

By ticking this box and submitting your request, you agree to this procedure and to European Bioplastics sharing your data with third parties. You have the right to revoke your agreement anytime. The terms and conditions of our privacy policy <http://www.european-bioplastics.org/datenschutzerklarung-data-privacy-statement/> apply.

PLEASE SEND THE COMPLETED FORM TO INFO@EUROPEAN-BIOPLASTICS.ORG.
